THE AEON LAW PRIORITY PATENT PROCESS

Contact us to begin your patent journey at AEONLaw.com

FIXED-PRICE

We provide a fixed-price package proposal for your fast-track patent application. This helps your budget - and eliminates surprises.

DISCLOSE

Your patent attorney meets with you to distill out the essence of your invention and create your initial invention disclosure.

SEARCH

Using an AI-assisted search tool, we identify any relevant prior art to determine the scope of your invention.

CLAIM

We combine your invention disclosure and any relevant prior art in an AI co-pilot to generate an initial set of patent claims with your invention's scope that will maximize your allowable protection.

DRAW

1

Using the patent claims, we then generate high-level patent diagrams representing your distilled invention and schedule a milestone meeting for a high-level overview of the patent drawings.

SPECIFY

We integrate the patent claims and patent drawings using the AI co-pilot to create an initial specification of your distilled invention, which is then polished by your patent attorney.

COMBINE

We combine the claims, drawings and specifications to create a patent application for your approval and your patent attorney works with you on any revisions.

FILE

We digitally submit your approved application to the U.S. Patent and Trademark Office for priority examination under the Track One program.

ADVOCATE

We rapidly respond to the USPTO's expedited communications during the Track One process until your patent is allowed (or we receive a Final Office Action).

PATENT

Once the patent is allowed, we give it a final polish; pay the issue fee; and confirm with you that it will proceed to registration.

CELEBRATE!

Your invention is now patented! If you want to put your patent into action, we can help with that too.
